

****Associate dentist Job advert for experienced and graduate dentists in Hervey Bay QLD****

As there are many adverts going around I will make it as brief as I can.

What's in it for you?:

- ✓ A great team culture that focuses on growth, development in a fun working environment.
- ✓ Full book of patients to take over
- ✓ State of the art brand new building designed to establish an inspiring environment for staff, clinicians, and comfort of patients.... [See more](#)

You will learn a lot with Khaled Shahin. Would suit an EODO graduate as he does a lot of excellent Orthodontics

It has a great pleasure to work alongside with Khaled. He is an amazing mentor and very supportive. It would be a great opportunity for clinicians who would like that support, especially new grads. Hervey bay is also very chill place to live too. Best of all, no traffic!

There is a lot of support, especially for new graduate. Clinical setting is fantastic (CBCT, rotary endo, OPG, implant etc) and patient flow is great. Principle dentist (Khaled) is very approachable for case discussions and will guide you through difficult cases. A great opportunity for a dentist who would like to work hard and practices good dentistry. Hervey bay is a nice town to live and local community is lovely. Very good work-life balance.

Excellent , supportive and fun workplace. Khaled has sound knowledge and he imparts it to others . I personally feel lucky and thankful to **Khaled Shahin** for helping me with my initial implant cases . If you are a new Graduate wanting to join a fun working team with a great mentor , this is a great opportunity.

you couldn't ask for a better mentor than **Khaled Shahin**. His clinical knowledge and wisdom for patient management are second to none and will be at your disposal 24/7. As a boss he is exceedingly patient and generous. For all levels of experience he will provide you the autonomy to take on bigger cases but also the support when you need it. Highly recommend this opportunity

Im an associate dentist at Lakeside, i can confidently say this is the best practice that I work for in my past 5 years of experience, there is lot of support, care and team bonding. All you have to do is focus on your work, and willingness to learn. Practice has got all the things you need, scanners(soon) cbct, endo. Like mentioned above, Khaled is greatly approachable for any discussion whether it be clinical or personal.
